The Toughest Show on Earth is the
ultimate behind-the-scenes chronicle of

the divas and the dramas of New York's Metropolitan Opera House, by the remarkable man who rose from apprentice carpenter to general manager. Joseph Volpe gives us an anecdote-filled tour of more than four decades at the Met, an institution full of vast egos and complicated politics. With stunning candor, he writes about the general managers he worked under, his embattled rise to the top, the maneuverings of the blue-chip board, and his masterful approach to making a family of such artist-stars as Luciano Pavarotti, Placido Domingo, Teresa Stratas, and Renee Fleming, and such visionary directors as Franco Zeffirelli, Robert Wilson, and Julie Taymor. Intimate and frank, *The Toughest Show on Earth* is not only essential for music

lovers, but for anyone who wants to understand the inner workings of the culture business.

Artist Sondra Perry (b. 1986, USA)

foregrounds the tools of digital production in her videos and performances to reflect critically on new technologies of representation and to remobilise their potential. Her work revolves around black American history and ways in which technology shapes identities, often with her own personal history as a point of departure. The exhibition at the Serpentine Sackler Gallery will be Perry's first solo presentation of her work in Europe and continues the Serpentine's engagement with her practice, which began with her

moving image intervention for the 2016 Park Nights series. The exhibition will include a site-specific installation incorporating existing works.

"Making and Being draws on the lived experience of Susan Jahoda and Caroline Woolard, visual arts educators who have developed a framework for teaching art with the collective BFAMFAPhD that emphasizes contemplation, collaboration, and political economy. The authors share ideas and pedagogical strategies that they have adapted to spaces of learning which range widely, from self-organized workshops for professional artists to Foundations BFA and MFA thesis classes. This hands-on guide includes activities, worksheets, and assignments and is a critical

resource for artists and art educators today"--Page 4 of cover.

Every photographer who worked during the analog age ended up at some point with a bag of stray rolls of film. Orphans. Lost. Photojournalist Ron Haviv found over 200 rolls of undeveloped film in 2015—material spanning twenty years, and as many countries. When he had them developed and scanned, he encountered famous faces, close friends, and places of conflict—the stuff of his trade. Images of Northern Ireland riots, gangs in El Salvador, war in Kosovo, China, refugees, Bill Clinton, Al Gore, and a wild mix of lost memories that forced the photographer to sit quietly while doing mental detective work to try to

recover the context for these frames. The film wasn't perfect. In fact, the film was massively flawed. But it was beautiful. A blend of mold, pooling dye, time and fog, the film had transformed into one-of-a-kind analog artwork, representing some of the most important news stories in recent history. *The Lost Rolls* is edited by Robert Peacock with essays by W.M. Hunt, Dr. Lauren Walsh, and Ron Haviv.

Renowned baking instructor, and author of *The Bread Baker's Apprentice*, Peter Reinhart explores the cutting-edge

developments in bread baking, with fifty recipes and formulas that use sprouted flours, whole and ancient grains, nut and seed flours, alternative flours (such as teff and grape skin), and allergy-friendly and gluten-free approaches. A new generation of bakers and millers are developing innovative flours and baking techniques that are designed to extract the grain's full flavor potential—what Reinhart calls “the baker's mission.” In this lushly photographed primer, Reinhart draws inspiration from these groundbreaking methods to create master recipes and formulas any home baker can follow, including Sprouted Sandwich Rye Bread, Gluten-Free Many-Seed Toasting Bread, and Sprouted Wheat Croissants. In many instances, such as with sprouted flours,

preferments aren't necessary because so much of the flavor development occurs during the sprouting phase. For grains that benefit from soakers, bigas, and sourdough starters, Reinhart provides the precise guidance that has made him such a trusted expert in the field. Advanced bakers will relish Reinhart's inventive techniques and exacting scientific explanations, while beginning bakers will rejoice in his demystification of ingredients and methods—and all will come away thrilled by bread's new frontier. *Correction to the Sprouted Whole Wheat Bread recipe on page 63: The volume measure of water should be 1 $\frac{3}{4}$ cups plus 1 tablespoon, not 3 $\frac{1}{4}$ cups.

A riveting look at the transformative year in the lives and careers of the legendary group whose groundbreaking legacy would forever change music and popular culture. They started off as hysteria-inducing pop stars playing to audiences of screaming teenage fans and ended up as musical sages considered responsible for ushering in a new era. The year that changed everything for the Beatles was 1966—the year of their last concert and their first album, *Revolver*, that was created to be listened to rather than performed. This was the year the Beatles risked their popularity by retiring from live performances, recording songs that explored alternative states of consciousness, experimenting with avant-garde ideas, and speaking their

minds on issues of politics, war, and religion. It was the year their records were burned in America after John's explosive claim that the group was "more popular than Jesus," the year they were hounded out of the Philippines for "snubbing" its First Lady, the year John met Yoko Ono, and the year Paul conceived the idea for Sgt. Pepper's Lonely Hearts Club Band. On the fiftieth anniversary of this seminal year, music journalist and Beatles expert Steve Turner slows down the action to investigate in detail the enormous changes that took place in the Beatles' lives and work during 1966. He looks at the historical events that had an impact on the group, the music they made that in turn profoundly affected the culture around them, and the vision that allowed

four young men from Liverpool to transform popular music and serve as pioneers for artists from Coldplay to David Bowie, Jay-Z to U2. By talking to those close to the group and by drawing on his past interviews with key figures such as George Martin, Timothy Leary, and Ravi Shankar—and the Beatles themselves—Turner gives us the compelling, definitive account of the twelve months that contained everything the Beatles had been and anticipated everything they would still become.

Postmodernism For Beginners ACTAR Publishers

Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors

recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians.

Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

If you are like most people, you're not sure what Postmodernism is. And if this

were like most books on the subject, it probably wouldn't tell you. Besides what a few grumpy critics claim, Postmodernism is not a bunch of meaningless intellectual mind games. On the contrary, it is a reaction to the most profound spiritual and philosophical crisis of our time - the failure of the Enlightenment. Jim Powell takes the position that Postmodernism is a series of "maps" that help people find their way through a changing world.

Postmodernism For Beginners features the thoughts of Foucault on power and knowledge, Jameson on mapping the postmodern, Baudrillard on the media, Harvey on time-space compression, Derrida on deconstruction and Deleuze and Guattari on rhizomes. The book also discusses postmodern artifacts such as

Madonna, cyberpunk, Buddhist ecology, and teledildonics.

In his most wide-ranging and accessible work, Frederic Jameson argues that postmodernism is the cultural response to the latest systemic change in world capitalism. He seeks here to crystallize a definition of a term which has taken on so many meanings that it has virtually lost all historical significance. He presents an extensive discussion on the cultural landscape - both 'high' and 'low' - of postmodernity, evaluating the political fortunes of the new term and surveying postmodern developments in a range of different fields - from market ideology to architecture, from painting and instalment art to contemporary punk film, from video art and high literature to deconstruction. Finally, Jameson reevaluates the concept of postmodernism in light of postmodern

critiques of totalization and historical narratives - from the notion of decadence to the dynamics of small groups, from religious fundamentalism to hi-tech science fiction - while touching on the nature of contemporary cultural critique and the possibilities of cognitive mapping in the present multinational world system. This provocative book will be fundamental to all future discussions of postmodernism.

This edited collection examines the culture of surveillance as it is expressed in the built environment. Expanding on discussions from previous collections; *Spaces of Surveillance: States and Selves* (2017) and *Surveillance, Race, Culture* (2018), this book seeks to

explore instances of surveillance within and around specific architectural entities, both historical and fictitious, buildings with specific social purposes and those existing in fiction, film, photography, performance and art. Providing new readings of, and expanding on Foucault's work on the panopticon, these essays examine the role of surveillance via disparate fields of enquiry, such as the humanities, social sciences, technological studies, design and environmental disciplines. Surveillance, Architecture and Control seeks to engender new debates about the nature of the surveilled environment through detailed analyses of architectural structures and spaces; examining how cultural, geographical and built space buttress and produce

power relations. The various essays address the ongoing fascination with contemporary notions of surveillance and control.
