Neuroplasticity and Rehabilitation

Cambridge University Press

Brain plasticity is the focus of a growing body of research with significant implications for neurorehabilitation. This state-of-the-art volume explores ways in which brain-injured individuals may be helped not only to compensate for their loss of cognitive abilities, but also possibly to restore those abilities. Expert contributors examine the extent to which damaged cortical regions can actually recover and resume previous functions, as

well as how intact regions are recruited to take on tasks once mediated by the damaged region. Evidence-based rehabilitation approaches are reviewed for a range of impairments and clinical populations, including both children and adults.

Homework Helpers: Chemistry is a user-friendly review book that will make every student—or parent trying to help their child feel like he or she has a private Chemistry tutor.

Concepts are explained in clear, easy-to-understand language, and problems are worked out with step-by-step methods that are easy to follow.

Each lesson comes with numerous review questions and answer

keynotes that explain each correct answer and why it's correct. This book covers all of the topics in a typical one-year Chemistry curriculum, including: A systematic approach to problem solving, conversions, and the use of units. Naming compounds, writing formulas, and balancing chemical equations. Gas laws, chemical kinetics, acids and bases, electrochemistry, and more. While Homework Helpers: Chemistry is an excellent review for any standardized Chemistry test, including the SAT-II, its real value is in providing support and guidance during the year's entire course of study.
