"Arktos is the first book ever written on the archetype of the Poles: celestial and terrestrial, North and South. It is a hair-raising voyage through cosmology, occultism and conspiracy theory leads to startling revelations about the secrets of the Poles. The author investigates legends of a Golden Age, which some claim ended in a prehistoric catastrophe, a shift in the earth's axis. This is examined in the light of the latest geological theories, as are predictions of a coming pole-shift. The perennial fascination of these ideas is shown to be part of a "polar tradition" of hidden wisdom. There are many recorded tales of an ancient race said to have lived in the Arctic regions, which later spread through the Northern Hemisphere. This supposedly "Aryan Race" entered the pantheon of Nazi Germany, with dreadful consequences. The author examines the origins of modern neo-Nazi ideology, its "polar" inspiration, and its links with other arcana, including the survival of Hitler, German bases in Antarctica, UFOS, the Hollow Earth, and the hidden kingdoms of Agartha and Shambhala. However, "Arktos" differs from most writings on these subjects in its responsible and scholarly treatment, and its extensive use of foreign-language sources."--Provided by publisher.

Léon Bloy's *Exégèse des lieux communs*-first published in 1902-appears here in English for the first time through Wiseblood Books. Among the novels, essays, biographies, and journals composed by Bloy, there is one work whose only appropriate classification was given directly in its title: *Exegesis of Commonplaces*-a peculiar foray into a genre normally reserved for theologians. And yet, as Albert Béguin notes in his sublime *Léon Bloy: A Study in Impatience*, Bloy's entire output may be seen as a labor of exegesis: "...it became Bloy's aim to make his mind as transparent as possible to the light of grace and to penetrate further and further into the mysteries hidden beneath the surface of history and the state of mankind." In the present volume, this "light of grace" is refracted upon the infallibly trite and rigorously unexamined language of the bourgeoisie. Banalities such as "Business is business," "You can't have everything," "I'll believe it when I see it," "Money can't buy happiness," etc., are treated with the gravity of sacred incantation and provide the framework for Bloy's dissections. As a matter of structure, *Exegesis* recalls Flaubert's *Dictionary of Received Ideas* or Bierce's *Devil's Dictionary*, but whereas the latter are largely satirical (and cynical) attacks on an emerging class of acquisitive conformists, Bloy's project excavates the spiritual content of what might otherwise be dismissed as mere

vapidities. Though he despises the bourgeoisie for its greed and vanity, for its hypocrisies and cruelties, Bloy nevertheless recognizes that "the most inane representatives of the bourgeoisie are themselves fearsome prophets," and that, "in the form of Commonplaces, they continually and unwittingly advance truly impressive claims, the implications of which, to them, remain unknown." Those implications, the supernatural blood invigorating an otherwise superficial and often incoherent idiom, are Bloy's true subject, and it is the purpose of his *Exegesis* to distill their essence.

*The Soul of Napoleon (L'âme de Napoléon, originally)*, by Léon Bloy, is a poem in prose on the great general's achievements and greatness, but it is more than that, it is a re-assessment of his significance from a Catholic and a Catholic eschatological point of view, as perhaps no other writer than Léon Bloy could have put down on paper. Written in 1912, it is also, like many of Léon Bloy's writings, prophetic in an eerie way of near-term events to come, a prefiguration of both WWI and beyond. "The history of Napoleon is quite certainly the most unknown of all histories. Books that claim to recount it are innumerable, and there is no end to documents of every sort. In reality, Napoleon is perhaps less known to us than Alexander and Sennacherib. The more one studies, the more one discovers that he is the man whom nothing resembles and that's all there is. It's the unfathomable gulf. One knows the dates, one knows the deeds, victories or disasters, one knows, a bit or quite a bit, of the famous negotiations that are, today, merely dust. His name alone remains, his prodigious Name, and when it is pronounced by the poorest of all children, it is enough to make a great man blush, no matter whom. Napoleon is the Face of God in darkness." "There is, in the humblest churches of France, a poor lamp lit night and day, before the Holy Sacrament of the Altar. The thought crossed my mind, absurd perhaps, that that lamp is something like Napoleon's confidence."

Power in medieval society has traditionally been ascribed to figures of public authority--violent knights and conflicting sovereigns who altered the surface of civic life through the exercise of law and force. The wives and consorts of these powerful men have generally been viewed as decorative attendants, while common women were presumed to have had no power or consequence. Reassessing the conventional definition of power that has shaped such portrayals, *Women and Power in the Middle Ages* reveals the varied manifestations of female power in the medieval household and community--from the cultural power wielded by the wives of Venetian patriarchs to the economic power of English peasant women and the religious power of female saints. Among the specific topics addresses are Griselda's manipulation of silence as power in Chaucer's "The Clerk's Tale"; the extensive networks of influence devised by Lady Honor Lisle; and the role of medieval women book owners as arbiters of lay piety and ambassadors of culture. In every case, the essays seek to transcend simple polarities of public and private, male and female, in order to provide a more realistic analysis of the workings of power in feudal society.

The chapter on The Undulatory Aspects of the Electron has the special historical interest of having been delivered as a Lecture on the occasion of the Authors receipt of the Nobel Award, while that on Wave Mechanics and its Interpretations was given as an Address at the Glasgow meeting of the British Association in 1928. I am indebted to Dr. J. E. Turner, of the University of Liver pool, for assistance with the translation and the proofs, and to Dr. C. Strachan, of the same University, I am indebted for valuable assistance in dealing with the equations and the more technical passages, as well as for reading the proofs. W. H. J. PREFACE THE amiable insistence of my friend Andr George has induced me to collect in the present Volume a number of Studies on con temporary Physics written from both the general and the more metaphysical point of view. Each of these Studies forms an inde pendent whole, and can be read by itself. A slight degree ofrepeti tion which the reader is asked to overlook has been the inevi table result for on more than one occasion I have been compelled to duplicate a summary of the great fundamental stages of con temporary Physics, such as the classification of simple substances, the investigation of the photo-electric effect and the origin of the Theory of Light Quanta and of Wave Mechanics the subjects are somewhat technical, and I cannot well assume that they are common knowledge. But though the same subject is outlined in several of these Studies, I have tried to take up a different point of view in each, and have endeavoured to throw light on different

aspects of the essential problems of Quantum Physics in order to facilitate a grasp of their importance. On comparing the different chapters the reader will observe that, while overlapping, they also complement one another and he will feel the fascination and greatness inherent in the vast structure of modern Physics. And while admiring the vast number and the extreme delicacy of experimental facts which laboratory physicists have succeeded in revealing, and the strange and brilliant concepts devised by theorists to explain them, he will appreciate to what a degree the methods and ideas of physicists have grown in subtlety during recent years, and how great has been the progress from the somewhat ingenuous Realism and the over-simplified Mechanics of earlier thinkers. The more deeply we descend into the minutest structures of Matter, the more clearly we see that the concepts evolved by the mind in the course of everyday experience especially those of Time and Space must fail us in an endeavour to describe the new worlds which we are entering. One feels tempted to say that the outlines of our concepts must undergo a io MATTER AND LIGHT progressive blurring, in order that they may retain some semblance of relevance to the realities of the subatomic scales. Time and Space, in other words, are too loose a dress for the elementary entities individuality becomes attenuated in the mysterious pro cesses of interaction, and even Determinism, the darling of an older generation of physicists, is forced to yield...

Jacques Derrida's prolific output has been the delight (and sometimes the despair) of philosophers and literary theorists for over twenty years. His influence on the way we read theoretical texts continues to be profound. No serious contemporary thinker can fail to come to terms with deconstruction and there have been a number of monographs devoted to his work. Very few, however, have combined a critical edge with a detailed knowledge of his writing. The contributors to this volume were each asked - in the most positive sense - to take just such a critical approach. There are substantive papers by Jean-Luc Nancy, Manfred Frank, John Sallis, Robert Bernasconi, Irene Harvey, Michel Haar, Christopher Norris, Geoff Bennington, John Llewelyn and an introduction by David Wood.

Joan of Arc and Germany (originally Jeanne d'Arc et l'Allemagne), by Léon Bloy, was published in 1915. It is an account of the marvelous and miraculous prodigy, her overnight transformation from simple country girl of Lorraine to master military tactician and strategist, from virgin to general, from nobody to savior of France, putting an abrupt end to the Hundred Years War with England. It is based on historical documents, trial documents, eye witness accounts, modern historical interpretations, as well as generously peppered with the author's own loving enthusiasm for, and unique vision of, the beatified and subsequently canonized Saint Joan of Arc. With ever an eye on historical symbolism, the author compares France's war with the Germans of World War I to its war with the English during the Hundred Years War. Léon Bloy says it best when he says: "The world never stops, it always keeps going. Immemorial, secular progression of the strong and the oppressed, of the iniquitous and the innocent whom they crush down, towards the communal grave of Eternity. History is merely a cry of grief throughout the centuries. It is as if there had not been a Redemption. One would be tempted to believe it if, every now and then, marvelous creatures did not appear who seem to say that the All Powerful is captive for an

indeterminate period of time, that Supreme Justice is provisionally enchained, and that men of goodwill must trust in their God. Prefigurative creatures of consolation and hope, by their actions, of an unimaginable magnificence that the Scriptures announced."

"In these unprecedented times" (ugh) we need a prophet. But prophets are hard to come by in the flesh and blood, unless we unearth one from the modern or post-modern past, from our own graveyards preferably. If fusty, fetid, fecal, and fiery Léon Bloy cannot fit the bill, we don't know who can. *Salvation Through the Jews* picks up where certain apocryphal, poetic, eschatological, and prophesying chapters in *The Desperate Man* left some readers panting for more. It was published 6 years after the latter novel, and one can see in it the sprouting sequel of a germ planted in 1886, if not earlier. Léon Bloy was a great artist and a genius. Nobody can deny that. And there is artistry in this book; he uses it deftly to make a compelling point. But like all arguments, one needs to hear the major and minor premises first before arriving at the synthesis or conclusion. This work NEEDS to be read even if one is not a Christian or a Jew because although it is about the Passion and although it is about the so-called "Jewish problem," on another level it is something else, and one can take the Jews and Christians out of the equation altogether, strip them naked, bleach them white, remove their particulars from this book, and replace them rather easily by more modern equivalent cardboard cutouts in the theater of now. On a more scholarly note, according to U.C. Berkeley Professor of History, John Connelly, this book is important because it had a major influence -- doubtless through the auspices of French Catholic philosopher Jacques Maritain, a friend of Bloy's -- on the Second Vatican Council's formulation in 1965 of section 4 of *Nostra aetate*, which formally and radically changed the Catholic Church's 1500+ year-old attitude towards Judaism.

This book explores relationships among consciousness, orality (and literacy) and culture - an area of study in which the work of Walter Ong is integral. Essays are constructed around notions articulated and argued for by Ong but then extended into new territories by other specialists in the fields he touches. While all of the essays involve the study of media, consciousness and culture, to some degree, voice, a primary medium of communication, receives special attention, as do the effects of writing, print and television in particular circumstances; for example a media ecology of Iran today describes the interplay of primary orality of 'illiterate' people, secondary (electronic) orality, and print.

Thirty tales of theft, onanism, incest, murder and a host of other forms of perversion and cruelty from the "ungrateful beggar" and "pilgrim of the absolute," Léon Bloy. *Disagreeable Tales*, first published in French in 1894, collects Bloy's narrative sermons from the depths: a cauldron of frightful anecdotes and inspired misanthropy that represents a high point of the French Decadent movement and the most emblematic entry into the library of the "Cruel Tale" christened by Villiers de l'Isle-Adam. Whether depicting parents and offspring being sacrificed for selfish gains, or imbeciles sacrificing their own individuality on a literary whim, these tales all draw sustenance from an underlying belief: the root of religion is crime against man, nature and God, and that in this hell on earth, even the worst among us has a soul. A close friend to Joris-Karl Huysmans, and later admired by the likes of Kafka and Borges, Léon Bloy (1846-1917) is among the best known but least translated of the French Decadent writers. Nourishing antireligious sentiments in his youth, his outlook changed radically when he moved to Paris and came under the influence of Barbey d'Aurevilly, the unconventionally religious novelist best known for *Les Diaboliques*. He earned the dual nicknames of "The Pilgrim of the Absolute" through his unorthodox devotion to the Catholic Church, and "The Ungrateful Beggar" through his endless reliance on the charity of friends to support him and his family.

This book is the result of five leading feminist scholars' collaborative effort to assess the impact of the contemporary women's movement on American scholarship. Focusing on the multi-disciplinary character of feminist research, the authors examine the emergence of feminist perspectives in history, literature, education, anthropology and philosophy. They also go beyond these specific disciplines and take a hard look at the concerns that unite all feminist scholars: the existence and origins of women's oppression; its ideological and psychological expressions; its relation to work and family; the possibilities of women's liberation; and the implications of modernization programs and socialist revolutions for women.
