Praised for its comprehensive coverage and clear organization, *Critical Care Nursing: Diagnosis and Management* is the go-to critical care nursing text for both practicing nurses and nursing students preparing for clinicals.

Critical Care Nurse Jones & Bartlett Publishers

The purpose of this project is to understand how nurse caring

ability impacts job burnout in the cardiac catheterization laboratory (CCL). The workload in the cardiac catheterization laboratory is often chaotic and frequent disruptions can occur due to emergent cases which interrupts the flow of the normal workday. These procedures occur during the day and at night requiring an overnight call team which often consist of a minimum of one Registered Nurse, minimum of one Radiology Technologist, and a third team member consisting of either of the above disciplines. Call requirements are in addition to their regularly scheduled work week and may result in nurse burnout. A quantitative methodology was utilized to compare how nurses rated their caring ability and the hours of call associated with the rating of caring ability. The Caring Ability Inventory Tool was used to measure the nurses caring ability using a seven point Likert scale rating. After a change in call requirements was implemented, the cumulative t-test result for all nurse participants for the Caring Ability Inventory tool was 4.748. A statistically significant relationship was found between the scoring of the Caring Ability Inventory and the hours of call scheduled for each nurse. The level of significance was 0.005. Hours associated with call requirements have a direct impact on how nurses perceive their caring ability as measured by the Caring Ability Inventory. This may impact patient outcomes in the cardiac catheterization laboratory.

Brunner & Suddarth's Textbook of Canadian Medical-surgical Nursing John Wiley & Sons

Based on a philosophy of active learning, this innovative text uses unfolding case studies as a compelling vehicle for learning fundamental nursing content. Unlike traditional vignettes, these case studies evolve over time as real-life situations, better

enabling students to develop the skills they need to problem solve, actively engage, and use critical thinking techniques in new situations. The unfolding case study method also assists in the development of skills that are important for nursing students about to embark on the NCLEX-RN. The text incorporates all types of NCLEX-style questions into the unfolding case studies to facilitate exam preparation. This method offers a unique study opportunity that integrates all fundamental concepts and skills application with practice and professional role responsibilities. The patient care content areas that are needed for NCLEX-RN success--safe and effective care, health promotion, physiological and psychological integrity--are interwoven into an engaging format. References at the end of each chapter provide guidance for additional study as needed. Electronic and web resources provide quick access to valuable web-delivered information that will be useful in a clinical setting. eBook versions of this text will take the reader directly to the web resource. Key Features:

Integrates core nursing concepts and content into unfolding case studies Provides engaging test review preparation for course success and NCLEX-RN test success Offers students a refreshing new study option and relief from endless Q&A format offered by other content review books Develops critical thinking skills to help students "think like a nurse" Incorporates all types of NCLEX-style questions into unfolding case studies

[Measuring Nurse Burnout in the Cardiac Catheterization Laboratory](#) Elsevier Health Sciences

Grossman & Baim's *Cardiac Catheterization, Angiography, and Intervention*, 8e is the premier reference on cardiac catheterization, and appeals to seasoned practitioners, residents and cardiology fellows. This title reflects the rapid evolution and

growing clinical use of hemodynamic data and of imaging and interventional techniques.

NCLEX-PN Prep Plus Lippincott Williams & Wilkins

Fundamentals of Nursing - E-Book Springer Publishing Company

Make sure you're prepared for the VTNE with the completely updated Review Questions and Answers for Veterinary Technicians! Author Heather Prendergast breathes new life into this edition with 5,000 questions that have been reviewed and revised to reflect the most recent changes to the VTNE. The content begins with a Foundation of Knowledge Review that addresses hospital management, calculations, terminology, and anatomy and physiology. The second part focuses on VTNE review with complete coverage of the nine primary subject areas on the exam, including the newest domains of pain management/analgesia and emergency medicine/critical care. A companion Evolve website helps build your knowledge and confidence with an electronic testing experience. You can create customized practice tests and take timed practice exams that mirror the actual VTNE and provide instant feedback and detailed rationales. Exam results are archived to allow you to keep track of your progress in each domain. Answers with rationales and sources for correct and incorrect answers on the Evolve companion website help you understand the reasoning and knowledge behind each answer and assist with recalling correct answers. Questions are written specifically for veterinary

technician students and practicing veterinary technicians to cover the essential information you need to succeed on the VTNE. Multiple-choice question format mirrors the questions on the VTNE. A variety of questions at different difficulty levels increase your VTNE scoring potential by testing factual knowledge, reasoning skills, and clinical judgment related to veterinary technician duties. NEW! A simulated VTNE testing environment on the companion Evolve website features a bank of 5,000 questions, allowing you to create customized practice tests and take timed practice exams that provide instant feedback and extended rationales. NEW! Questions on pain management/analgesia and emergency and critical care prepare you for these two domains on the VTNE. NEW! 5,000 revised and updated multiple-choice questions reflect the latest VTNE test format to ensure you have the most up-to-date exam review and preparation.

Cumulated Index Medicus Springer Publishing Company Designed to meet the needs of today's students, Lowdermilk's *Maternity Nursing*, 8th Edition - Revised Reprint addresses the fundamentals of maternity nursing with a concise, focused presentation of the care of women during the childbearing years. Integrating considerations for family, culture, and health promotion into the continuum of care, it also addresses community-based care to emphasize that nursing care takes place in many settings. *Maternity Nursing* focuses on childbearing issues and concerns, including care of the newborn, as well as wellness promotion and management of common women's health problems. Critical thinking exercises present case studies of real-life situations and corresponding critical thinking questions to help you develop your analytical skills. NEW! A helpful appendix identifies text content that reflects the QSEN competencies - patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics - to assist you in developing competencies to provide safe and effective nursing care. NEW! Focus on the family recognizes the nurse's need to integrate the family in the care of the mother and

newborn and the importance of the role of the mother to the wellbeing of the family. NEW! Content updates throughout, including information on the late preterm infant and associated concerns such as feeding; guidelines on prioritization and delegation where relevant; and centering pregnancy, a new model of health care that brings women together in groups for their care. NEW! Evidence-based practice content focuses your attention on how to use current research to improve patient outcomes. NEW! Improved readability helps you learn more efficiently with shorter, more focused content discussions. NEW! *21st Century Maternity Nursing: Culturally Competent, Community Focused* chapter combines introductory material, culture, and community into one chapter to help you focus on key content and concepts. NEW! Streamlined content highlights the most essential, need-to-know information.

Adult-Gerontology Acute Care Nurse Practitioner Q&A Review Elsevier Health Sciences

Accompanying CD-ROM contains a 265-question examination with rationales and test-taking tips for additional review.

Clinical Case Studies for the Family Nurse Practitioner Elsevier Health Sciences

Nursing Procedures and Protocols is designed to help nurses react to clinical situations appropriately with little or no guidance from colleagues. Protocols represent the framework for management of a specific disorder or clinical situation, while the procedures that compliment a specific protocol represent the numerous detailed steps for implementing that protocol. This book features over 300 major peer-reviewed protocols and nursing procedures on a wide range of clinical topics. Each procedure is described in sequential step-by-step detail. Also included are over 300 illustrations, checklists, tables, and flowcharts. Icons are used throughout the book to draw attention to the evidence base for a particular protocol, alerts for specific considerations related to the protocol, and troubleshooting tips for equipment used in the protocol.

Maternal-Child Nursing Test Success Simon and Schuster

Stroke is a medical emergency that requires immediate medical attention. With active and efficient nursing management in the initial hours after stroke onset and throughout subsequent care, effective recovery and rehabilitation is increased. Acute Stroke Nursing provides an evidence-based, practical text facilitating the provision of optimal stroke care during the primary prevention, acute and continuing care phases. This timely and comprehensive text is structured to follow the acute stroke pathway experienced by patients. It explores the causes, symptoms and effects of stroke, and provides guidance on issues such as nutrition, continence, positioning, mobility and carer support. The text also

considers rehabilitation, discharge planning, palliative care and the role of the nurse within the multi-professional team. Acute Stroke Nursing is the definitive reference on acute stroke for all nurses and healthcare professionals wishing to extend their knowledge of stroke nursing. Evidence-based and practical in style, with case studies and practice examples throughout Edited and authored by recognised stroke nursing experts, clinicians and leaders in the field of nursing practice, research and education The first text to explore stroke management from UK and international perspectives, and with a nursing focus
