Acting as the planet's air conditioner, the rainforest sucks up millions of tons of greenhouse gases and stores them safely out of the atmosphere. South America's deforestation threatens to unleash a kind of "carbon bomb" that will add to our already deteriorating climate difficulties. As he travels across Peru and Brazil, recognized South America expert Nikolas Kozloff talks to locals, scientists and activists about the rainforest and what should be done to avert its collapse. Drawing on his expertise of South American politics, Kozloff argues that cooperation between the world's countries is essential in turning back the tide of climate change and that the fate of the planet depends on our response to environmental problems within the southern hemisphere.

**Paddle to the Amazon**

Hunter Publishing, Inc  
The true story of three enthusiastic (but inexperienced) adventurers who attempt to become the first team to raft the entire length of the Amazon River--all 4,007 miles--and (barely) live to tell about it. To a trio of twenty-something adrenaline junkies, it sounded like an irresistible challenge: tackle the Amazon with nothing more than a rubber raft between them and fate. But when Colin Angus, Ben Kozel, and Scott Borthwick embarked on their fantastic voyage in September 1999, just climbing to the river's source nearly killed them. Beginning with the dehydration that nearly did the adventurers in as they hiked the Andes to the river's source, Amazon Extreme is a breathtaking account of the daily challenges, dangers, and triumphs experienced over the course of this five-month expedition. With no money to speak of and inaccurate, fifty-year-old maps to guide them, this

intrepid trio manages to persevere through violent rapids, guerilla gunfire, mosquito-infested drinking water, and numerous bouts of sickness. But in spite of several near-death experiences, including one particularly terrifying moment when their raft is toppled in the raging white water, Angus's crew finds a reverence for the compelling beauty that makes this region so renowned. Amidst the hardship are moments of pure pleasure, from graceful dolphins and lush forests to the intriguing, gracious people who've made their homes along the riverbank. An inspiring tale of courage and exploration, this is the story of three guys who truly went off the deep end, and one who came back to write a riveting recollection of it.

It was crazy. It was

unthinkable. It was the adventure of a lifetime. When Don and Dana Starkell left Winnipeg in a tiny three-seater canoe, they had no idea of the dangers that lay ahead. Two years and 12,180 miles later, father and son had each paddled nearly twenty million strokes, slept on beaches, in jungles and fields, dined on tapir, shark, and heaps of roasted ants. They encountered piranhas, wild pigs, and hungry alligators. They were arrested, shot at, taken for spies and drug smugglers, and set upon by pirates. They had lived through terrifying hurricanes, food poisoning, and near starvation. And at the same time they had set a record for a thrilling, unforgettable voyage of discovery and old-fashioned adventure.

'During recent years a sinister shadow has fallen across the world of travel and travel-writing. It's name is Sponsorship' writes Dervla Murphy in her foreword to John Harrison's unsponsored Amazon adventure, an extremely hazardous canoe trip taken just for the hell of it up one of the more obscure tributaries of the Amazon. Harrison's tale is compelling, full of

suspense, humour and wonderful descriptions of Amazon wildlife, all told in down-to-earth unpretentious language with disarming honesty. His quest to reach the upper limit of the Jari river in Brazil and portage his canoe across the border into French Guiana is ambitious, exciting and, ultimately, flawed, but it's the trip itself, full of unexpected encounters, crippling bouts of malaria, moments of intense emotion mixed with just a tinge of madness, which is as inspiring as the tales of even the earliest adventurers. John Harrison uses vigorous, unpretentious language combined with stunning descriptions of Amazonian wildlife. *Up the Creek* was originally published by Bradt in 1986 and remains as relevant to the spirit of exploration and real, raw travel writing today as it was then. Reviews at that time hailed Harrison's adventure as epic.

### **No Rain in the Amazon**

Open Road Media

Traveling to the Amazon Rainforest to learn about the wildlife that inhabit the Upper Amazon region of Peru was one of the most memorable experiences of my life. AMAZON ADVENTURE is the story of my incredible journey through the world's most spectacular rainforest. From the moment I flew into the regional capital city of Iquitos, until I returned to the United States, my travels on the world's greatest river, the Amazon, and its tributaries, my trip included one thrilling moment of discovery after another. Racing down the Amazon River in a fast boat from Iquitos to the isolated Explorama Lodge nestled deep in the rainforest, I was amazed by sheer number of plants and animals that call this part of the world home. Iquitos is located 2,200 miles from the Atlantic Ocean, yet the river is so wide at that point that you can barely see one shore to the other (further downstream as the river gets bigger, and bigger, and bigger, you can sail down the middle of the

river and not see either shoreline!). Altogether the river is over 4,000 miles long, and over its long journey from a small stream high in Andes Mountains in Peru, until it finally empties into the Atlantic, the Amazon River contains an unbelievable diversity of animal life including stingrays, electric eels, bull sharks, lungfish, pink river dolphins, manatees, caiman (reptiles related to alligators and crocodiles), as well as more different species of fish than live in the Atlantic Ocean. As I traveled through the lush, green rainforest with my guide Roldan, I saw a vast array of rainforest animals from quick-moving spider monkeys, to barely-moving sloths, as well as tapirs, capybaras, poison dart frogs, and many other living creatures. One highlight of this part of my trip was seeing the bright blue wings of a morpho butterfly flash past, and observing a giant wasp dragging a young tarantula across the forest floor. After thoroughly exploring the area surrounding the Explorama Lodge, we boarded another boat and traveled to the Amazon Center for Environmental Education and Research (ACEER) to learn about

the important work they are doing to preserve the Amazon Rainforest, and the plants and animals that call the Amazon home. Undoubtedly, the most exciting part of our visit was our walk along the ACEER's canopy walkway. Swaying back and forth as we went higher and higher into the canopy gave us a view of the rainforest that was incredibly beautiful and thrilling at the same time. Reaching the highest point of the walkway at 180 feet, we found ourselves looking down at the tops of 100-foot tall trees! Once we left the ACEER site, we found ourselves back on the water, and it wasn't long before we had yet another amazing experience. As we cruised along in our small boat, suddenly we heard a loud splash. When we turned around to see what would make such a loud noise, we saw a large river dolphin shoot out of the water in a playful leap. What a sight! The final leg of my amazing journey through Peru's Upper Amazon region was aboard an fantastically beautiful boat named La Amatista. This large river boat was complete with luxury, woodlined cabins, and views of the surrounding rainforest

that looked like something straight out of a magazine. Each day we would sail out from La Amatista in small boats to explore the tributaries of the Amazon River. On one such trip early one morning we were greeted by the loud barking sounds of a tree filled with

large red howler monkeys. They weren't happy with our incursion into their territory, and were not afraid to let us know about it! On yet another side trip in our small boats, we tied up on some trees in a black-water lagoon where we used impromptu fishing

poles to fish for a local favorite - red belly piranhas! Being that close to water filled with the hungry, vicious "swimming teeth" gave new meaning to the locals saying, "Sometimes you eat the piranha, and sometimes the piranha eats you."
