**Building a Special with Ant Anstead Master Mechanic** Haynes Manuals N. America, Incorporated

In 1984 Peugeot launched the 205 1.6 GTi, which not only changed Peugeot's image forever, but also set a new benchmark for 'hot hatches' eight years after the legendary Golf GTI had raised the bar. Weak points, rust traps, and potential mechanical defects are all laid bare by an expert for the would be buyer. Clear 205-specific photos illustrate problem areas and good points too, as well as model variations. The author also embraces customized and mechanically modified cars. A unique points scoring system lets you evaluate your potential purchase like and expert and also to determine which price category it should fall into. With both mileage and particularly condition having a marked affect on potential prices, the author gives sound advice on what is worth restoring and what, however tempting, is likely to cost a new owner an unrecoverable fortune. Weak points, rust traps, and potential mechanical defects are laid out for the reader, with clear 205-specific guidelines offered on the practicalities of rectifying such problems.

Haynes Service and Repair Manuals

Ant Anstead's Building a Special brings

the Haynes story full circle, coming 61

years after the original Building a 750

Special was written by John Haynes,

Haynes Publishing's founder, when he

was still a schoolboy. This book is a TV

tie-in, following the 12-part TV series Ant

Anstead Master Mechanic, aired on

Motor Trend, part of the Discover

Network in the US and UK, following Ant

Anstead's build of his own-design

'special' car, taking inspiration from the

Alfa 158 - the first World Championship-

winning F1 car, which raced from the

1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.
