Written as a practical Packt book brimming with engaging examples, C Programming for Arduino will help those new to the amazing open source electronic platform so that they can start developing some great projects from the very start. This book is great for people who want to learn how to design & build their own electronic devices. From interaction design art school students to the do-it-yourself hobbyist, or even simply people who want to learn electronics, this book will help by adding a new way to design autonomous but connected devices.

Bibliographie du Québec Rockport Pub
 Qu'est-ce qu'un annuaire LDAP ? Conçus pour répertorier aussi bien des personnes que des ressources matérielles ou logicielles, les annuaires

permettent une gestion sécurisée des droits d'accès aux ressources de l'entreprise et favorisent la personnalisation des applications internet et intranet. Le protocole LDAP (Lightweight Directory Access Protocol) standardise l'interface d'accès aux annuaires et facilite ainsi l'interconnexion des applications à un même référentiel. Un rôle clé dans les portails et les applications intranet, extranet et e-commerce Introduction à la gestion des identités, aux annuaires et au standard LDAP, la première partie de l'ouvrage offre un panorama détaillé des applications concrètes de cette technologie : administration réseau, contrôle de la sécurité et des droits d'accès aux applications intranet et extranet, gestion des profils et

personnalisation des portails d'entreprise, des sites marchands et des extranets, etc. Un guide de conduite de projet illustré d'études de cas détaillées. Après une deuxième partie dédiée à la présentation technique détaillée des standards LDAP, DSML et SAML, l'auteur montre dans la troisième partie comment concevoir et mettre en oeuvre un annuaire. Cette démarche de conduite de projet est illustrée à travers deux exemples réels d'applications d'entreprise, et complétée par un panorama des outils de gestion des identités. Destinée aux programmeurs, la dernière partie explique comment réaliser des applications d'accès aux annuaires LDAP exploitant différentes interfaces de programmation (C, Java et JNDI, ADSI et .NET avec Visual Basic et

C#, PHP), et se termine par un chapitre dédié à OpenLDAP. À qui s'adresse ce livre ? Aux décideurs et responsables fonctionnels qui souhaitent comprendre ce que peuvent apporter la gestion des identités et les annuaires d'entreprise. Aux consultants et chefs de projets chargés de la mise en place des composants d'une solution de gestion des identités (annuaires LDAP, entre autres). Aux administrateurs systèmes et réseaux (Windows 2000/2003, Unix, Novell, Linux...). Aux concepteurs et développeurs de portails d'entreprise et d'applications intranet, extranet ou e-commerce. Aux programmeurs LDAP, ADSI et .NET, Java/JNDI, C et C++/C#, XML/DSML, SAML, PHP, OpenLDAP... Poursuivez votre lecture sur le Web ! Téléchargez le code source des

Livrehebdo HarperCollins

This book constitutes the thoroughly refereed papers presented at five international workshops held in conjunction with the 6th International Conference on Service-Oriented Computing, ICSOC 2008, in Sydney, Australia, in December 2008. The volume contains 41 reviewed and improved papers presented at the 4th International Workshop on Engineering Service-Oriented Applications (WESOA 2008), the Second International Workshop on Web APIs and Services Mashups (Mashups 2008), the First International Workshop on Quality-of-Service Concerns in Service Oriented

Architectures (QoS-CSOA 2008), the First Workshop on Enabling Service Business Ecosystems (ESBE 2008), and the Third International Workshop on Trends in Enterprise Architecture Research (TEAR 2008). The papers offer a wide range of hot topics in service-oriented computing: management and analysis of SOA processes; development of mashups; QoS and trust models in service-oriented multi-agent systems; service ecosystems, service standardization, and evolutionary changes of Web services; governance aspects of SOA, enterprise models and architectures.

Annuaire LDAP John Wiley & Sons
Fleeting human moments memorialized by Oberto Gili's camera translate formally into beautifully balanced classical images. His camera, like his

personality, is whimsical questioning, non-judgemental and tenderly objective. Gili's images of interiors capture fundamental moments of human existence, quiet moments and basic needs, whether it's a man sitting on his couch surrounded by his dogs, a young couple getting into bed, a woman watching herself getting dressed in the mirror or a girl swimming alone in a pool, we experience narrative, isolation, intrusion through Gili's lens. Gili shows us different perspectives of home: color, happiness, sex, depression, arrogance, creativity, simplicity, boredom. These images in this stunning volume are a diary of the interiors and situations that have, over the last thirty years, strung Gili's curiosity and fantasy the most. Simple, still and understated, Gili's

images of interiors all have possibility as their subtext. Illustrated

BIBLIOGRAPHIE DE LA FRANCE - LIVRES DU MOIS - JANVIER 1998. Walther Konig Verlag

A compendium for everybody who is interested in what art will be like in the upcoming decade: Global pioneers of data-driven design share their projects and give behind-the-scene looks at some of the most genre-redefining work, providing insights and outlooks on how it influences our current and future reality.

From roaring nightlife to peaceful yoga retreats, Ibiza's hippie-chic atmosphere is its hallmark. This quintessential Mediterranean hot spot has served as an escape for artists, creatives, and musicians alike for decades. It is a place

to reinvent oneself, to walk the fine line between civilization and wilderness, and to discover bliss. Ibiza Bohemia explores the island's scenic Balearic cliffs, its legendary cast of characters, and the archetypal interiors that define its signature style.

One Show Design, Volume 7 Pearson Education France

Ensamble Studio is a cross-functional team founded in 2000, led by architects Antoñ Garcí?a-Abril and De?bora Mesa. Balancing imagination and reality, art and science, their work innovates typologies, technologies and methodologies to address issues as diverse as the construction of the landscape or the prefabrication of the house. From their early works: SGAE Headquarters, Hemeroscopium House or

The Truffle in Spain, to their most recent: Ensamble Fa?brica in Madrid and Ca'n Terra in Menorca, Spain, every project makes space for experimentation aiming to advance their field. Currently, through their start-up WoHo, they are invested in increasing the quality of architecture while making it more affordable by integrating offsite technologies. Their new research and fabrication facility in Madrid, Ensamble Fa?brica, has been built to support this endeavour. Together they are committed to sharing ideas and cultivating synergies between professional and academic worlds through teaching lecturing and research: she is Ventulett Chair in Architectural Design at Georgia Tech and he is a Professor at MIT, where they co-founded the POPlab - Prototypes of Prefabrication

Laboratory- in 2012.

Architecture John Wiley & Sons

The renowned school “shares the classic techniques they teach: It’s French cooking made easy, interspersed with a glimpse into life in regional France” (Fathom). IACP Cookbook Award for Food Photography & Styling IACP Cookbook Award for Design Mother and daughter American expats Marjorie Taylor and Kendall Smith Franchini always dreamed of living in France. With a lot of hard work and a dash of fate, they realized this dream and cofounded The Cook’s Atelier, a celebrated French cooking school in the storybook town of Beaune, located in the heart of the Burgundy wine region. Combining their professional backgrounds in food and wine, they attract visitors from near and

far with their approachable, convivial style of cooking. Featuring more than 100 market-inspired recipes and 300 exceptional photographs, this comprehensive reference is an extension of their cooking school, providing a refreshingly simple take on French techniques and recipes that every cook should know—basic butchery, essential stocks and sauces, pastry, dessert creams and sauces, and preserving, to name a few. Seasonal menus build on this foundation, collecting recipes that showcase their fresh, vegetable-focused versions of timeless French dishes, such as: Green Garlic Soufflé Watermelon and Vineyard Peach Salad Little Croques Madames Sole Meunière with Beurre Blanc and Parsleyed Potatoes Seared Duck Breast with Celery Root Puree and

Chanterelles Madeleines Plum Tarte Tatin Almond-Cherry Galette More than a practical introduction to classic French cooking, this richly illustrated volume is also a distinctively designed celebration of the French art of joie de vivre and “is likely to have readers fantasizing about their own escapes to France” (Publishers Weekly, starred review).

An Instant #1 New York Times Bestseller
A Goop Book Club Pick "If you want your breath to catch and your heart to stop, turn to Kate Baer."--Joanna Goddard, Cup of Jo
A stunning and honest debut poetry collection about the beauty and

hardships of being a woman in the world today, and the many roles we play - mother, partner, and friend. "When life throws you a bag of sorrow, hold out your hands/Little by little, mountains are climbed." So ends Kate Baer's remarkable poem "Things My Girlfriends Teach Me." In "Nothing Tastes as Good as Skinny Feels" she challenges her reader to consider their grandmother's cake, the taste of the sea, the cool swirl of freedom. In her poem "Deliverance" about her son's birth she writes "What is the word for when the light leaves the body?/What is the word for when it/at last, returns?" Through poems that are as unforgettably beautiful as they are accessible, Kate Bear proves herself to truly be an exemplary voice in modern poetry. Her words make women feel

seen in their own bodies, in their own marriages, and in their own lives. Her poems are those you share with your mother, your daughter, your sister, and your friends.

This much-anticipated revision, written by the ultimate group of top security experts in the world, features 40 percent new content on how to find security holes in any operating system or application. New material addresses the many new exploitation techniques that have been discovered since the first edition, including attacking "unbreakable" software packages such as McAfee's Enterecept, Mac OS X, XP, Office 2003, and Vista. Also features the first-ever published information on

exploiting Cisco's IOS, with content that has never before been explored The companion Web site features downloadable code files

The Age of Data ABRAMS

The perfect book for every Mississippian who cares about the state, this is a mammoth collaboration in which thirty subject editors suggested topics, over seven hundred scholars wrote entries, and countless individuals made suggestions. The volume will appeal to anyone who wants to know more about Mississippi and the people who call it home. The book will be especially helpful to students, teachers, and scholars researching, writing about, or otherwise discovering the state, past and present. The volume contains entries on every county, every governor, and numerous

musicians, writers, artists, and activists. Each entry provides an authoritative but accessible introduction to the topic discussed. The Mississippi Encyclopedia also features long essays on agriculture, archaeology, the civil rights movement, the Civil War, drama, education, the environment, ethnicity, fiction, folklife, foodways, geography, industry and industrial workers, law, medicine, music, myths and representations, Native Americans, nonfiction, poetry, politics and government, the press, religion, social and economic history, sports, and visual art. It includes solid, clear information in a single volume, offering with clarity and scholarship a breadth of topics unavailable anywhere else. This book also includes many surprises readers can only find by browsing.

Anticancer Living Classics

An approach to software design that introduces a fully automated analysis giving designers immediate feedback, now featuring the latest version of the Alloy language. In *Software Abstractions* Daniel Jackson introduces an approach to software design that draws on traditional formal methods but exploits automated tools to find flaws as early as possible. This approach—which Jackson calls “lightweight formal methods” or “agile modeling”—takes from formal specification the idea of a precise and expressive notation based on a tiny core of simple and robust concepts but replaces conventional analysis based on theorem proving with a fully automated analysis that gives designers immediate feedback. Jackson has developed Alloy, a

language that captures the essence of software abstractions simply and succinctly, using a minimal toolkit of mathematical notions. This revised edition updates the text, examples, and appendixes to be fully compatible with Alloy 4.

How to use design as a tool to create not only things but ideas, to speculate about

possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas, ideals, and

approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.

The Mogao Grottoes, a World Heritage Site in northwestern China, are located

along the ancient caravan routes—collectively known as the Silk Road—that once linked China with the West. Founded by a Buddhist monk in the late fourth century, Mogao flourished over the following millennium, as monks, local rulers, and travelers commissioned hundreds of cave temples cut into a mile-long rock cliff and adorned them with vibrant murals. More than 490 decorated grottoes remain, containing thousands of sculptures and some

45,000 square meters of wall paintings, making Mogao one of the world's most significant sites of Buddhist art. In 1997 the Getty Conservation Institute, which had been working with the Dunhuang Academy since 1989, began a case study using the Late-Tang dynasty Cave 85 to develop a methodology that would stabilize the deteriorating wall paintings. This abundantly illustrated volume is the definitive report on the project, which was completed in 2010.
