McGraw-Hill's ACT, 2011 Edition McGraw Hill Professional
At a time when knowledge is being 're-valued' as central to curriculum concerns, subject English is being called to account. *Literary Knowing and the Making of English Teachers* puts long-standing debates about knowledge and knowing in English in dialogue with an investigation of how English teachers are made in the 21st century. This book explores, for the first time, the role of literature in shaping English teachers' professional knowledge and identities by examining the impacts, in particular, of their own school teaching in their 'making'. The voices of early career English teachers feature throughout the work, in a series of vignettes providing reflective accounts of their professional learning. The authors bring a range of disciplinary expertise and standpoints to explore the complexity of knowledge and knowing in English. They ask: How do English teachers negotiate competing curriculum demands? How do they understand literary knowledge in a neoliberal context? What is core English knowledge for students, and what role should literature play in the contemporary curriculum? Drawing on a major longitudinal research project, they bring to light what English teachers see as central to their work, the ways they connect teaching with their disciplinary training, and how their understandings of literary practice are contested and reimagined in the classroom. This

innovative work is essential reading for scholars and postgraduate students in the fields of teacher education, English education, literary studies and curriculum studies.

Paradigms of Knowledge Management OIBooks-Libros

There are a lot of good books available to help people write better. They include dictionaries, usage guides, and various types of writers' manuals - and professional writers ought to have many of those books on their bookshelves. But most architects and other design and construction professionals are not professional writers. Instead, they are people who spend a large part of their professional lives writing. That's a big difference, and that's where this book will help. The Architect's Guide to Writing has been written not by an English major, but by Bill Schmalz, an architect who knows the kinds of documents his fellow professionals routinely have to write, and understands the kinds of technical mistakes they often make in their writing. This book is designed to meet the specific needs of design and construction professionals. It's not going to waste their time with the things that most educated professionals know, but it will help them with

the things they don't know or are unsure of. It's not a Chicago Manual-sized encyclopaedic reference that includes everything any writer would ever need to know, because architects don't need to know everything. But what they do need to know - and what they use every day in their professional lives - has been assembled in this book.

"Stories matter. Stories speak about complex aspects of our lives that intuitively we know are important but for which the language of rational discourse is often inadequate. Stories draw on archetypal structures and evocative language in ways that create affect: they penetrate, provoke, and disturb. This is a book of nine stories about teachers and students. A young woman sits in her first teacher-education lecture and wonders what kind of a tribe she is joining. A preservice teacher clashes with his mentor teacher on a practicum. A teacher and students inhabit an online space with unpredictable consequences. Sally discovers the Universarium. Joseph writes a story that undoes his therapist.

Sylvia struggles to free herself from an oppressive discourse about the nature of teaching. Two siblings support and console each other through their complex inductions into classroom lifeworlds. A secondary student goes missing and police, the media and his teachers wonder why. A teacher-education academic wrestles with elusive ideas in order to prepare a lecture that he hopes will make a more-than-passing impact. There is no other book like *Imagined Worlds and Classroom Realities*. It not only tells nine gripping stories, but also positions these stories as part of a growing scholarship about story-telling. It includes, as well, practical ways of using the stories in teacher education and professional development. Steve Shann is a teacher and writer with over forty years experience in primary, secondary and tertiary classrooms. "

This two-volume book explores how the great buildings of England bear witness to a thousand years of the nation's history. In every age, investment in iconic buildings reaches a climax when the prevailing mode of production is operating most effectively, surplus wealth is most plentiful, and the dominant class rules supreme. During such periods of stability and prosperity, the demand for new buildings is strong, structural and stylistic innovations abound, and there is fierce competition to build for lasting fame. Each such climax produces a unique vintage of hegemonic buildings that are monuments to the wealth and power of those who ruled their world. This first volume provides an introduction to the study of wealth accumulation over the past millennium. There follow three case studies of iconic building investment from the eleventh to the

seventeenth century. During the eleventh and twelfth centuries the conquering Norman kings and barons erected castles throughout the country to cement their feudal power. During the thirteenth and fourteenth centuries the great wealth of the ecclesiastical estates funded the lavish construction of Gothic

cathedrals and abbeys. During the sixteenth and early seventeenth centuries Tudor and Jacobean magnates vied to build the most magnificent palaces and prodigy houses. The English Revolution brought this era to a close.
