The Crisis of Medieval Russia 1200-1304

A source of up-to-date information on current water resources, their quality

and quantity, in every country in the Balkans. Institutional structures, water management issues and water monitoring problems are analyzed, with special reference to international waters, using characteristic case studies, including the Sava River, Lake Ohrid, The

Nestos/Mesta River, the Neretva River estuary, and coastal waters in Turkey. Contributions written by experts from France, the UK and the USA demonstrate state-of-the-art electronic networking and the management of distributed water databases. The protection of water resources in the Balkans has become a high profile issue since the collapse of communism in the area, the break up of former Yugoslavia, and ethnic tensions in Kosovo. Transboundary river pollution and the development of international water basins call demand urgent regional co-operation, which will be facilitated by the International Network of Water-Environment Centres for the Balkans, the initiation of which is described in the final conclusions of the book.

In the late sixteenth century, a prominent Albanian named Antonio Bruni composed a revealing document about his home country. Historian Sir Noel Malcolm takes this document as a point of departure to explore the lives of the entire Bruni family, whose members included an archbishop of the Balkans, the captain of the papal flagship at the

Battle of Lepanto--at which the Ottomans were turned back in the Eastern Mediterranean--in 1571, and a highly placed interpreter in Istanbul, formerly Constantinople, the capital of the Eastern Roman Empire that fell to the Turks in 1453. The taking of Constantinople had profoundly altered the map of the Mediterranean. By the time of Bruni's document, Albania, largely a Venetian province from 1405 onward, had been absorbed into the Ottoman Empire. Even under the Ottomans, however, this was a world marked by the ferment of the Italian Renaissance. In *Agents of Empire*, Malcolm uses the collective biography of the Brunis to paint a fascinating and intimate picture of Albania at a moment when it represented the frontier between

empires, cultures, and religions. The lives of the polylingual, cosmopolitan Brunis shed new light on the interrelations between the Ottoman and Christian worlds, characterized by both conflict and complex interdependence. The result of years of archival detective work, *Agents of Empire* brings to life a vibrant moment in European and Ottoman history, challenging our assumptions about their supposed differences. Malcolm's book guides us through the exchanges between East and West, Venetians and the Ottomans, and tells a story of worlds colliding with and transforming one another.

This volume presents the most complete collection available of the work of Victor

Zarnowitz, a leader in the study of business cycles, growth, inflation, and forecasting.. With characteristic insight, Zarnowitz examines theories of the business cycle, including Keynesian and monetary theories and more recent rational expectation and real business cycle theories. He also measures trends and cycles in economic activity; evaluates the performance of leading indicators and their composite measures; surveys forecasting tools and performance of business and academic economists; discusses historical changes in the nature and sources of business cycles; and analyzes how successfully forecasting firms and economists predict such key economic variables as interest rates and inflation.

Management Acheron Press  
New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold

with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27

photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

A ubiquitous organism able to infect all mammals and birds, which has been estimated to infect one third of the global human population, *Toxoplasma gondii* is the most successful parasite on Earth, and toxoplasmosis a major zoonotic disease. A current approach to this zoonosis is the "one health" concept, based on the understanding that a disease occurring between animals and

man in a specific environment can only be dealt with at the interface of all "players" involved. This book, composed of a series of articles which integrate human and animal data on toxoplasmosis, by authors from all over the world, offers its readers a view on the current research interests and achievements.

The Danube-Oder-Elbe Canal promised to create an integrated waterway system

across Europe, linking Black Sea ports to Atlantic markets and giving landlocked Czech nation its own connections to the ocean. The fascinating history of this never-completed project, *European Coasts of Bohemia* tells the story of the experts who confronted and contributed to different and often conflicting geopolitical visions of Europe. Jíra Janác shows how the canal-backers adapted themselves to various political developments, such as the break-up of the Austrian-Hungarian Empire and the integration into the Soviet Bloc, while still managing to keep the canal project alive.

Global activity has broadly strengthened and is expected to improve further in 2014-15, according to the April 2014 WEO, with much of the impetus for growth coming from advanced economies. Although downside risks have diminished overall, lower-than-expected inflation poses risks for advanced economies, there is increased financial volatility in emerging market

economies, and increases in the cost of capital will likely dampen investment and weigh on growth. Advanced economy policymakers need to avoid a premature withdrawal of monetary accommodation. Emerging market economy policymakers must adopt measures to changing fundamentals, facilitate external adjustment, further monetary policy tightening, and carry out structural reforms. The report includes a chapter that analyzes the causes of worldwide decreases in real interest rates since the 1980s and concludes that global rates can be expected to rise in the medium term, but only moderately. Another chapter examines factors behind the fluctuations in emerging market economies' growth and concludes that strong growth in

China played a key role in buffering the effects of the global financial crisis in these economies.

#### Facing An Unequal World HarperCollins

A comprehensive account of current knowledge of human diseases caused by infection due to protozoal organisms. These diseases include amoebiasis, leishmaniasis, giardiasis, trypanosomiasis and most importantly malaria. Organised according to infective agent, the book systematically looks at the agent itself, the pathogenesis (AI - disease process) and the clinical features of the disease entities it causes, as well as its treatment and control. The author follows a standard format for each organism: Historical review, the agent, symptomology, differential diagnosis, diagnostic

(including DNA) procedures, therapy, epidemiology and prevention and control. The book is comprehensively referenced, including classic landmark papers, key current papers, and state of the art reviews.

**Kosovo Divided** Harper Collins

Albania is not well known by outsiders; it was deliberately closed to the outside world during the communist era. Now it has thankfully become free again, its borders are open and it can be visited, and it is increasingly integrating with the rest of Europe and beyond.

Unfortunately, Albania has had its share of problems in the post-communist era; it's a land of destitution and despair, thanks in part to the Albanian mafia, which has turned the country into one of blood-feuds, kalashnikovs, and eternal

crises. Yet, Albania is, in essence, a European nation like any other and will soon, it is to be hoped, advance and take its proper place in Europe and the world. The second edition of the Historical Dictionary of Albania relates the history of this little-known country through a detailed chronology, an introduction, a bibliography, appendixes, and over 700 cross-referenced dictionary entries on significant persons, places, and events; institutions and organizations; and political, economic, social, cultural, and religious facets.

Given the recent revival of nationalism in many parts of the world in tandem with new conflicts and forms of interventionism, this book uses the case of Kosovo to discuss some of key problems around contemporary practices of state-building. Based on exhaustive research and fieldwork, Marius Calu investigates how the management of plurality is a fundamental element of contemporary state-building seeking to build social cohesion, while for the new-born Kosovo it stands as vital symbol for its domestic sovereignty and legitimisation. With the

aim of understanding why and in what ways the management of diversity has become a central element of state-building in post-conflict Kosovo, this study juxtaposes the de jure multi-ethnic liberal democratic form of governance with the de facto results and consequences of Kosovo's task to protect, accommodate and integrate its ethnic minorities.
