Siegfried Zielinski argues that the history of the media does not proceed predictably from primitive tools to complex machinery. In Deep Time of the Media, he illuminates turning points of media history - fractures in the predictable - that help us see the new in the old."--Book jacket.	
<i>Immoral Memories</i> Alfred Music Publishing Anthony D. Smith is Emeritus Professor of Nationalism and Ethnicity at the London School of Economics, and is considered one of the founders of the interdisciplinary field of nationalism studies. Anthony Smith has developed an approach to the study of nations and nationalism called ethno-symbolism, which is concerned with the nature of ethnic groups and nations, and the need to consider their symbolic dimensions. This text provides a concise statement of an ethno-symbolic approach to the study of nations and nationalism and at the same time, embodies a general statement of Anthony Smith's contribution to this approach and its application to the central issues of nations and nationalism. The text: sets out the theoretical background of the emergence of ethno-symbolism in a sustained and systematic argument explains its analysis of the formation of nations, their persistence and change and the role of nationalism demonstrates that an ethno-symbolic approach provides an important supplement and corrective to past and present intellectual orthodoxies in the field and addresses the main theoretical criticisms levelled at an ethno-symbolic approach. Drawing together and developing earlier brief resumes of Anthony Smith's approach, this book represents a summary of the theoretical aspects of his work in the field since 1986. It will be useful to students and to all those who are interested in the issues raised by a study of ethnicity, nations and nationalism.

First 50 Disney Songs You Should Play on the Piano Houghton Mifflin Harcourt "Sergei Eisenstein (1898-1948), creator of such masterpieces as Battleship Potemkin, Alexander Nevsky and Ivan the Terrible, was perhaps the greatest of all film directors. He wrote his autobiography in 1946, two years before his death, and it is a work of major importance in the light it sheds on his personality and mercurial genius. Vivid, eccentric and free-ranging, Immoral Memories is written in a style reminiscent of the brilliant visual effects of montage and dynamic progression that characterize its author's film-making technique. He recounts his life in Russia from the time of the Revolution, during which he served in the Bolshevik army as a volunteer, his travels in the West and his encounters with a remarkable medley of individuals during his long career. He gives us unique insights, too, into his triumphs and tribulations. His disappointments and despair were exemplified by the banning of the film Ivan the Terrible, Part II, which was not released until fifteen years after his death. And he never expected his autobiography to be published in Russia. Yet in answer to his query "Has there been life" he replied that there had been "life lived acutely, joyously, tormentedly, at times even sparkling, unquestionably colourful, and such a life that, I suppose, I would not exchange for another"'"--Publisher's description.

<i>Blank Space Sheet Music</i> Stanford University Press The past is what happened. History is what we remember and write about that past, the narratives we craft to make sense out of our memories and their sources. But what does it mean to look at the past and to remember that "nothing happened"? Why might we feel as if "nothing is the way it was"? This book transforms these utterly ordinary observations and redefines "Nothing" as something we have known and can remember. "Nothing" has been a catch-all term for everything that is supposedly uninteresting or is just not there. It will take some—possibly considerable—mental adjustment before we can see Nothing as Susan A. Crane does here, with a capital "n." But Nothing has actually been happening all along. As Crane shows in her witty and provocative discussion, Nothing is nothing less than fascinating. When Nothing has changed but we think that it should have, we might call that injustice; when Nothing has happened over a long, slow period of time, we might call that boring. Justice and boredom have histories. So too does being relieved or disappointed when Nothing happens—for instance, when a forecasted end of the world does not occur, and millennial movements have to regroup. By paying attention to how we understand Nothing to be happening in the present, what it means to "know Nothing" or to "do Nothing," we can begin to ask how those experiences will be remembered. Susan A. Crane moves effortlessly between different modes of seeing Nothing, drawing on visual analysis and cultural studies to suggest a new way of thinking about history. By remembering how Nothing happened, or how Nothing is the way it was, or how Nothing has changed, we can recover histories that were there all along.
