This textbook has been conceptualized as per the recommended National Education Policy (NEP) 2020 and as per the syllabus prescribed by Karnataka State Higher Education Council (KSHEC) for B.Sc. students of Mathematics. It covers important topics such as Matrices, Polar Coordinates, Differential Calculus and Successive Differentiation for sound conceptual understanding.

*Introduction to Educational Technology*  
London ; Melbourne [etc.] : Macmillan  
"An introductory theatre text focusing on theatre practitioners and their processes. Using an accessible tone and a focused exploration of how theatre artists work, the book covers playwrights; directors; actors; designers of sets; costumes, and props; and lights, sounds, and technology; as well as the varying roles of scholars, critics, and dramaturgs." - Back cover.  
*Mathematics for B.Sc. Students: Semester I: Algebra I and Calculus I: (According to KSHEC) (NEP 2020 Karnataka)* "O'Reilly Media, Inc."

In this book, nationally renowned scholars

join classroom teachers to share equity-oriented approaches that have been successful with urban high school mathematics students. Compiling for the first time major research findings and practitioner experiences from Railside High School, the volume describes the evolution of a fundamentally different conception of learners and teaching. The chapters bring together research and reflection on teacher collaboration and professional community, student outcomes and mathematics classroom culture, reform curricula and pedagogy, and ongoing teacher development. Mathematics for Equity will be invaluable

reading for teachers, schools, and districts interested in maintaining a focus on equity and improving student learning while making sense of the new demands of the Common Core State Standards. Book Features: Core principles of an equity-centered mathematics program. Examples of how to focus and organize the collaborative work of a math department to develop a shared pedagogy. Student experiences with an equity pedagogy that focuses on building perseverance, flexibility in thinking, and deep conceptual understanding. Connections between reconceptualizing learners and teaching, and achieving deep mathematics learning and equitable outcomes. Contributors include: Jo Boaler, Ilana Seidel Horn, Judith Warren Little, and Rachel Lotan. “Mathematics for Equity provides a kaleidoscopic view, in the voices of teachers, researchers, and students themselves, of one of the nation’s most ambitious and successful attempts at teaching mathematics for equity. It shows what it takes to create a climate that supports students and teachers in engaging in meaningful mathematical activity—and, alas, how vulnerable such

environments are to the wrong kinds of ‘accountability.’ Read it and learn.” —Alan H. Schoenfeld, University of California at Berkeley “Want to fix what’s wrong with mathematics instruction in your school? Read this book with your colleagues and do what it inspires you to do. Written by the brave teachers and former students who did it, as well as researchers.” —Phil Daro, writing team, Common Core Standards, Strategic Education Research Partnership  
The Philosophical and Sociological Foundations of Education S. Chand Publishing  
 Written in an easy-to-understand style, the text has been thoroughly revised in tune with the spirit and need of the new nomenclature Pedagogy of Social Sciences in place of the old designation Teaching of Social Studies. It reflects on the theoretical knowledge and practical skills required to teach Social Sciences in an effective manner. Introducing new chapters, the second edition of the book mainly focuses on improving the methodological concepts of the Social Sciences teachers. In doing so, it covers various strategies and devices of teaching Social Sciences, e-learning in

Social Sciences, e-learning resources in Social Sciences, and professional growth of the Social Sciences teacher. Besides, the chapters of the previous edition have been updated, with the required information given in various new sections. This book is suitable for a course on ‘Pedagogy of Social Sciences’ for the students of B.Ed. and M.A. (Education). It can also be used for the in-service teacher education programmes organized by the Central and State education boards. NEW TO THE SECOND EDITION □ In addition to the four new chapters, the book now incorporates several new sections: • Concept and meaning of the term Social Sciences; distinguishing the subject Social Sciences from Natural Sciences and the subject Social Studies; justification for using the term teaching/pedagogy of Social Sciences in place of teaching/pedagogy of Social Studies (Chapter 1) • Bloom’s revised taxonomy, 2001 (Chapter 4) • Views of NCF and Focus Group (NCERT) about curriculum at the various stages of school education (Chapter 5) • Survey method and cooperative learning method for the teaching of Social Sciences (Chapter 7) •

Reference books in Social Sciences (Chapter 9) • Atlases, newspapers, digital audio recorders and players and documentaries as instructional material or teaching aids (Chapter 11) • Question banks, grading system, open book examinations and use of rubrics as the means and ways for improving the evaluation programmes in Social Sciences (Chapter 23) □ Also, the chapter on 'Relationship of Social Studies with other Subjects' has been replaced with a more comprehensive and detailed chapter on 'Correlation in Social Sciences' (Chapter 6). KEY FEATURES □ Chapter-end summary and study questions to help readers review the important topics and drill the concept discussed, respectively. □ Numerous figures and tables to facilitate easy understanding of the concepts. □ References and Suggested Readings to provide scope for further reading.

Globalization and Higher Education in India analyses how the Indian education system can be re-structured to shape the cognitive skills, inter-personal sensibilities and cultural sophistication of the children and prepare them for a globalized knowledge society. For scholars and practitioners of sociology and education, as well as policy makers, it offers insights into the effect of liberalization on education and the impact of initiatives like public-private partnership and explores the roadblocks and facilitators on the road to educational reforms.

The new edition of A Textbook of Business Mathematics inches on its earlier editions and continues to provide a comprehensive coverage of important topics and concepts in business mathematics. The text integrates the standard curriculum and the manifold requirements of undergraduate business maths students.

National Conference on Management of Modern Libraries (NACML) PHI Learning Pvt. Ltd.

As higher education has made deliberate strides in recent decades to become more inclusive and accessible, the number of students from non-traditional backgrounds has increased dramatically. There has been much study of the effects of higher education on previously underserved populations, showing that it can lead to higher lifetime income and higher status. But there has been little research on what happens to those students once they are in a university. This book fills that gap, taking a close look at this issue and

drawing on case studies from the United States, the United Kingdom, and Australia to illuminate the problems that face non-traditional students, the resources they and their families are able to draw on, and the ways that administrators and staff can help them succeed. This paperback edition is well suited to postgraduate students and practitioners and alike.

□Algebra-II and Calculus-II□ is designed for B.Sc. students of mathematics (Second Semester) of Karnataka State Higher Education Council (KSHEC) as per the recommended National Education Policy (NEP) 2020. It covers important topics like □Recapitulation of number system□, □Completeness and Archimedean□ property of  $\mathbb{R}$ , Bolzano-Weierstrass theorem, Cayley's theorem, Lagrange's Theorem and Euler's  $\phi$  function, Homogeneous functions, Taylor's and Maclaurin's series, Line Integral Double Integral and Triple Integral.

Graph Theory and Applications Rowman & Littlefield

Abstract: This revision emphasizes the use of audiovisual materials as an integral and vital part of a particular program of instruction and serves as a practitioner's guide to their selection and utilization. The teacher is viewed as a manager, organizer, and evaluator of learning experiences as well as a motivator of

students. Audiovisual methods are viewed as an important part of the communication process that undergirds education. The text begins with a discussion of the theory and practice of audiovisual teaching followed by chapters dealing with selected audiovisual methods. Methods discussed include contrived experiences, purposeful experiences, demonstrations, study trips, exhibits, educational television, motion pictures, still pictures, radio, and recordings. A final section deals with the role of systems and technology in teaching and the educational process.

*Role of ICT in Higher Education* Atlantic Publishers & Dist

"Mathematical thinking is not the same as 'doing math'--unless you are a professional mathematician. For most people, 'doing math' means the application of procedures and symbolic manipulations. Mathematical thinking, in contrast, is what the name reflects, a way of thinking about things in the world that humans have developed over three thousand years. It does not have to be about mathematics at all, which means that many people can benefit from learning this powerful way of thinking, not just mathematicians and

scientists."--Back cover.

With the advent of the information and communication technologies, traditional library activities are undergoing transformation in a big way. Modern library's collection includes a vast array of information resources, databases, electronic journals, e-books, digital images, institutional repositories etc. To manage a modern library, library professionals need to have awareness and knowledge on management of electronic resources, federated and discovered tools for single click search, literature techniques, application of RFID and other technologies, user needs and knowledge on soft skills etc. Keeping these perspectives and issues in mind the National Conference on Management of Modern Libraries (NACML) was organized by SEARCH- The health science library in association with the department of Library and Information Science, Manipal University, Manipal The main objective of the conference was to provide an opportunity to LIS professional to explore the ways and means to manage the

modern libraries where electronic resources are playing an important role in meeting the information needs of the users and to explore, discuss and share ideas and knowledge related to innovative modern library management systems to meet the needs of the changing environment. In five technical sessions under five different categories titled

Technologies for Management, Best Practice in Modern Libraries, digital libraries and Role of Library Professionals in Management of Modern Libraries held over the two days, total 51 papers were presented at the conference. Various challenges and issues related to management of modern libraries were

discussed in the technical sessions and some of the authors shared the best practices of their libraries. The author highlighted the importance of digital libraries and stressed the needs of various skills to work in digital environment. The papers presented in the conference have been edited and brought out in the form of a conference proceedings.
