Here's a hove idea... giftbooks that allow your customers to  
 record their notes on particular subjects in a practical ringbound  
 giftbook that provides them with fun quotes as well. Notes And  
 Quotes is being published in three excellent salesworthy

categories: travel, gardening and recipes.

*Essentials of Cardiovascular Physiology* John Deere Publishing

Backed by solid research, Writing Instruction That Works answers  
 the following question: What is writing instruction today and what  
 can it be tomorrow? This up-to-date, comprehensive book  
 identifies areas of concern for the ways that writing is being  
 taught in todays secondary schools. The authors offer far-  
 reaching direction for improving writing instruction that assist  
 both student literacy and subject learning. They provide many  
 examples of successful writing practices in each of the four core  
 academic subjects (English, mathematics, science, and social  
 studies/history), along with guidance for meeting the Common  
 Core standards. The text also includes sections on Technology  
 and the Teaching of Writing and English Language Learners.

 CarTech Inc

Throughout human history, wars and violence have often been  
 waged in the name of religions and in the name of diverging

religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters

navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

Nursing and Informatics for the 21st Century Series is a critical resource in chronicling the huge historical shift in nursing linked to the explosion of EHR national and international strategies and health policies around the globe. Each book in the series examines the revolution that has occurred in nursing and explores the role IT continues to play in this transformation, with a thoughtful examination of nursing practice, science and research, and education. This book, Nursing Education and Digital Health Strategies explores the current state of health and healthcare education, as well as the current state of nursing informatics education. These topics include technologies-enabled education for all nurses and interprofessional collaborations from a worldwide perspective. The "New" learning for applied critical thinking will include technology, content, skills versus tools, and the use of "smart" systems for care delivery, the role of critical thinking and uniqueness of nursing care delivery. Further, how these changes are understood as a paradigm shift that needs to be incorporated along with nursing and healthcare education is emphasized. The effects of technology on human behavior are also explored, addressing human-factors interaction, interdependence of human computer interaction and other

effects of technology on wellbeing. As part of nursing education, learning from clients/patients to better shape and advance nursing education and scholarship are discussed. Academic-clinical practice partnerships for a digital future, how teams are working together (clinician/teacher) for better healthcare delivery and applied knowledge, including joint appointments (exchange of academia and applied expertise), academic-applied human resources, and interprofessional learning/development are discussed. The book closes by discussing and using case studies to showcase nursing competencies for the next decade, and implications for preparing the healthcare workforce for a digital world, faculty readiness and the interaction with gaming and simulations. Nursing informatics education, including continuing education beyond academia, i.e., informal education, worldwide is described as well as global challenges to support digital world capabilities. Hands-on Experiential Delivery (shifting from lecture-based delivery) - case studies learning-based exemplars are included.

**Seloc Yamaha Outboards** Hampton Roads Publishing  
Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron

constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

**Equipping Your Horse Farm** Bentley Publishers

This remarkably engaging textbook gives biology students an introduction to statistical practice all their own. It covers essential statistical topics with examples and exercises drawn from across the life sciences, including the fields of nursing, public health, and allied health. Based on David Moore's *The Basic Practice of Statistics*, PSLS mirrors that #1 bestseller's signature emphasis on statistical thinking, real data, and what statisticians actually do. The new edition includes new and updated exercises, examples, and samples of real data, as well as an expanded range of media tools for students and instructors.
